

WasteWise

WasteWise is a smart waste management web application designed to improve environmental cleanliness by connecting residents with waste collection services. The platform enables users to schedule waste pickups, report illegal dumping, access recycling information, and contribute to a cleaner, healthier community.

Project Overview

Poor waste disposal is a major environmental challenge in many communities. WasteWise provides a digital solution that simplifies waste management by making waste collection services more accessible while promoting recycling and environmental awareness.

Features

User-friendly and responsive interface

Schedule waste pickup requests

Report illegal dumping locations

Recycling tips and environmental education

Dashboard for tracking requests

Mobile-friendly design

Clean and modern UI

Technologies Used

HTML5

CSS3

JavaScript

Git & GitHub

Project Structure

WasteWise/

| — index.html

```
| — style.css
| — script.js
| — README.md
| — assets/
|   | — images/
|   | — logo.png
```

Installation

Clone the repository

git clone https://github.com/YOUR_USERNAME/WasteWise.git

Open the project folder.

Launch index.html in your browser.

Live Demo

Live Website: https://YOUR_USERNAME.github.io/WasteWise/

Screenshots

Add screenshots of your application here.

Objectives

Promote proper waste disposal.

Encourage recycling.

Improve environmental sustainability.

Support cleaner communities through technology.

Future Improvements

User authentication

GPS location for waste pickup

Push notifications

Online payment integration

Admin dashboard

Mobile application
